

DURGA

Full Stack Developer — MERN | Next.js

Delhi, India | +91 9311041261 | d88177600@gmail.com

GitHub: <https://github.com/durga-ojha611> | LinkedIn: <https://linkedin.com/in/durga-ojha>

AUR: <https://aur-tau.vercel.app> | Crop Doc: <https://crop-doc-r5gu.vercel.app/>

SUMMARY

Full Stack Developer (MERN/Next.js) shipping production AI apps end-to-end, backed by strong problem-solving, Data Structures & Algorithms, and system design fundamentals honed across 5+ national-level hackathons and coding contests. Led a cross-functional frontend team at YUCI, presenting UI/UX decisions directly to founders. Also engineered a systems-level C++ network security engine with a live monitoring dashboard.

EXPERIENCE

Lead Frontend Developer — Youth United Council of India (YUCI), Chennai

05/2026 – 07/2026 | <https://aur-tau.vercel.app>

Asian University Ranking System (AUR): a platform to evaluate, search, and compare universities across Asia through standardized metrics and a dynamic comparison matrix.

- **Led the frontend team** in designing and building AUR's entire core UI from the ground up — integrating the 4 key ranking factors, evaluation methodologies, and dedicated events & awards modules that power how users discover and compare universities.
- **Owned the admin ecosystem:** directed the build of a university-facing admin portal for self-serve profile management, plus a secure membership panel and content management tools — cutting manual backend intervention and giving non-technical stakeholders full autonomy over their data.
- **Drove the frontend deployment pipeline** end-to-end on Vercel and delivered a finalized, bug-free codebase — formally handing over ownership to the company's official repository for a clean, production-ready transition.
- **Presented UI/UX decisions directly to founders**, translating technical trade-offs into business-aligned choices while managing a cross-functional team through Git workflows and code reviews.

Tech: Next.js, React.js, FastAPI, Vercel, Render, Docker, Git/GitHub

SKILLS

Frontend: HTML5, CSS3, JavaScript, React.js, Next.js (SSR), Tailwind CSS

Backend: Node.js, Express.js, REST APIs, MongoDB (Atlas Vector Search), MySQL, Redis

Cloud & DevOps: AWS, Docker, CI/CD (GitHub Actions), Vercel, Render

AI/ML: OpenAI API, Semantic Search, TensorFlow.js, Google Generative AI

Systems: C++17, Multi-threading, Deep Packet Inspection, TCP/IP Parsing

Tools & Practices: Git, GitHub, Postman, JWT Auth, System Design, DSA (Java)

PROJECTS

Crop Doc — AI Leaf Disease Detection & Farming Assistant <https://crop-doc-r5gu.vercel.app/>

- Built live leaf-disease scanning with TensorFlow.js, delivering instant chemical & organic remedies.
- Engineered offline scan queuing with auto-sync — diagnosis works with zero connectivity.
- Shipped secure JWT authentication with email-based forgot-password recovery, AWS cloud storage for scan images, a community forum, and a farmer progress-tracking dashboard.

Tech: React.js, Node.js, Express.js, MongoDB, TensorFlow.js, AWS, JWT Auth, Nodemailer, Tailwind CSS

Nexus Engine — C++ Deep Packet Inspection System with Live Threat Dashboard

- Engineered a multi-threaded DPI engine in C++17 (pthread, CMake build) using Aho-Corasick for high-speed domain matching.
- Extracted TLS SNI in real time for domain classification, relayed via a Node.js/Express telemetry server over WebSockets with CORS-secured endpoints.
- Built a live React 19 + Vite dashboard with TailwindCSS and Recharts visualizations; used Python scripts to generate test PCAP data.

Tech: C++17, CMake, pthread, Aho-Corasick, Node.js, Express.js, WebSockets, React 19, Vite, TailwindCSS, Recharts, Python

EDUCATION

Bachelor of Computer Applications — Govt. College Bahadurgarh | Expected 08/2028 | CGPA 9.13

Senior Secondary — Sarvodaya Kanya Vidyalaya Qutubgarh | 04/2024 | CGPA 9.12

CERTIFICATIONS

- Data Science & Generative AI — ESS Institute (Compasur Edtech Pvt Ltd), Grade A+ (Distinction), 120-hr certified internship, Jul 2026
- Alpha (DSA with Java) — Apna College

ACHIEVEMENTS

- Ranked 13th nationwide among 5+ national-level hackathons with a blockchain-based expense-splitting app.
- 1st Position, College Tech Fest — built and presented a full web project to judges under time pressure.
- Architected a Space-Tech Aggregator consolidating NASA & ISRO datasets into a single queryable API.
