

DURGA

Full Stack Developer (MERN | Next.js)

Delhi, DL 110081 | +91 9311041261 | d88177600@gmail.com

github.com/durga-ojha611 | linkedin.com/in/durga-ojha | elan-lime.vercel.app

SUMMARY

Full Stack Developer skilled in React.js, Next.js, Node.js, Express.js, and MongoDB/MySQL (MERN stack), with hands-on experience building and deploying scalable, production-grade web apps. Built and deployed ELAN, a live AI-powered luxury e-commerce platform with SSR and semantic product search using OpenAI embeddings and MongoDB Atlas Vector Search, plus Cropdoc, an AI-driven plant disease detection app using TensorFlow.js. Experienced with RESTful API design, JWT authentication, performance optimization, and Git/GitHub workflows with CI/CD and Docker. Strong foundation in data structures, algorithms, and system design.

SKILLS

- **Languages & Frontend:** JavaScript, HTML5, CSS3, React.js, Next.js (SSR), Tailwind CSS
- **Backend & Databases:** Node.js, Express.js, RESTful APIs & CRUD Operations, MongoDB (Atlas Vector Search), MySQL
- **AI / ML Integration:** OpenAI API (Embeddings), Semantic Search, TensorFlow.js, Google Generative AI
- **Tools & Practices:** Git & GitHub (Version Control), Docker, CI/CD (GitHub Actions), Code Reviews, Debugging & Testing
- **Security & Auth:** JWT Authentication, Passport.js, Application Security Fundamentals
- **Other:** Problem Solving & Algorithms, System Design, Performance Optimization (LCP, SEO)

EXPERIENCE

Frontend Developer — Web Development Team | Youth United Council of India (YUCI) | 06/2026 – Present

- Led the frontend team for a global Asian University Ranking platform, architecting the project base from scratch using Next.js and Tailwind CSS.
- Built the Global Overview dashboard and Institution Directory with responsive data visualizations and high-density university metric cards.
- Engineered the Prestige Rankings leaderboards and a Comparison Matrix with side-by-side tables and an advanced search/filter dashboard.
- Designed and integrated an interactive AI panel delivering smart, actionable platform insights.
- Enforced a premium academic UI system and served as lead debugger, resolving UI glitches and console warnings.
- Managed the GitHub repository, resolving complex merge conflicts and guiding teammates to keep the main branch stable.

PROJECTS

ELAN — AI-Powered Luxury E-Commerce Platform | elan-lime.vercel.app

- Developed and deployed a high-performance luxury fashion e-commerce app using Next.js 16 (SSR) and a scalable Node.js/Express backend.
- Engineered an AI semantic search engine using MongoDB Atlas Vector Search and OpenAI's text-embedding-3-small, converting product catalogs into 1536-dimensional vector embeddings for natural-language search.
- Implemented Zustand with custom SSR-safe persistence middleware (sessionStorage) to manage user sessions, carts, and UI themes without hydration errors.
- Optimized Next.js Image components for Largest Contentful Paint (LCP) via eager-loading and secure remote URL patterns, improving SEO and load speed.
- Wrote automated Node.js seeding scripts to populate MongoDB with products while generating and syncing vector embeddings for instant search readiness.

Technologies: Next.js 16, React, Node.js, Express.js, MongoDB Atlas (Vector Search), OpenAI API (Embeddings), Zustand, Tailwind CSS

Cropdoc — AI-Powered Leaf Disease Detection App

- Built real-time leaf scanning using live camera input and TensorFlow.js, with chemical and natural remedy recommendations.
- Designed a community forum and progress-tracking dashboard, optimizing for performance and scalability.

Technologies: React.js, TypeScript, Tailwind CSS, Framer Motion, Firebase, Supabase, Google Generative AI, TensorFlow.js

EDUCATION

Govt. College Bahadurgarh — Bahadurgarh, India

Bachelor of Computer Applications, Computer Science | Expected 08/2028 | Current CGPA: 9.13

Sarvodaya Kanya Vidyalaya Qutubgarh — Delhi, India

Senior Secondary, Computer Science | 04/2024 | CGPA: 9.12

ACHIEVEMENTS

- 1st Position, College Tech Fest — Won the top prize by building and presenting a fully functional web project under time pressure, standing out for technical execution and innovation.
- National-Level Hackathon Competitor — Core backend developer and presenter across 5+ hackathons; built a blockchain-based expense-splitting app in a 2-day national hackathon, finishing 13th nationwide.
- Space-Tech Aggregator — Architected the backend for a unified platform consolidating NASA and ISRO datasets into one consistent, queryable API interface.
