[Portfolio](#) | [ELAN](#) | [Crop Doc](#)

SUMMARY

Full Stack Developer (MERN/Next.js) shipping production AI apps end-to-end. Led a cross-functional frontend team at YUCI, presenting UI/UX decisions to stakeholders. Built ELAN (AI semantic search e-commerce) and Crop Doc (real-time TensorFlow.js disease detection), both live in production. Strong communicator across engineering and non-technical stakeholders, owning full deployment pipelines (Vercel, Render, Docker).

SKILLS

- **Languages & Frontend:** JavaScript, HTML5, CSS3, React.js, Next.js (SSR), Tailwind CSS
- **Backend & Databases:** Node.js, Express.js, REST APIs, MongoDB (Atlas Vector Search), MySQL, Redis
- **AI / ML Integration:** OpenAI API (Embeddings), Semantic Search, TensorFlow.js, Google Generative AI
- **Tools & Deployment:** Git, GitHub, Docker, CI/CD (GitHub Actions), Postman, Vercel, Render
- **Security & Auth:** JWT Authentication, Passport.js, Application Security Fundamentals
- **DSA & Problem Solving:** Strong grasp of Data Structures & Algorithms (Java) — proven across national-level hackathons and coding contests
- **Other:** System Design, Performance Optimization (LCP, SEO)

EXPERIENCE

Lead Frontend Developer — Youth United Council of India (YUCI), Chennai

05/2026 – 07/2026 | Live: [aur-tau.vercel.app](#)

- **Led AUR** end-to-end — a global university ranking platform; owned UI/UX across the full Next.js + FastAPI stack, presenting design direction to founders.
- **Built the Comparison Matrix** feature from scratch — responsive Next.js UI backed by custom FastAPI routes, coordinated with backend engineers on API contracts.
- **Stabilized the main branch** — resolved deep UI bugs and complex merge conflicts, mentoring teammates through Git workflows.
- **Owned deployment architecture** — Dockerized FastAPI on Render, shipped Next.js on Vercel, documented setup for the team.

PROJECTS

ELAN — AI-Powered Luxury E-Commerce Platform — [elan-lime.vercel.app](#)

- Engineered AI semantic search with MongoDB Atlas Vector Search + OpenAI embeddings (1536-D).
- Shipped a high-performance SSR storefront on Next.js 16, powered by a scalable Node/Express backend.
- Built hydration-safe Zustand persistence — eliminated session, cart, and theme bugs across reloads.

Tech: Next.js 16, React, Node.js, Express.js, MongoDB Atlas (Vector Search), OpenAI API, Zustand, Tailwind CSS

Crop Doc — AI-Powered Leaf Disease Detection & Farming Assistant — [crop-doc-osoq.vercel.app](#)

- Built live leaf-disease scanning with TensorFlow.js, delivering instant chemical and natural remedies.
- Engineered offline scan queuing with auto-sync — diagnosis works reliably with zero connectivity.
- Shipped JWT authentication, a community forum, and a farmer progress-tracking dashboard.

Tech: React.js, TypeScript, Node.js, Express.js, MongoDB, Tailwind CSS, Framer Motion, TensorFlow.js

CERTIFICATIONS

- **Data Science & Generative AI** — ESG Institute (Compasur Edtech Pvt Ltd), Grade A+ (Distinction) — 120-hour certified internship, July 2026.
- **Alpha (DSA with Java)** — Apna College — certified in data structures & algorithms with Java.

EDUCATION

Bachelor of Computer Applications — Govt. College Bahadurgarh | Expected 08/2028 | CGPA: 9.13

Senior Secondary — Sarvodaya Kanya Vidyalaya Qutubgarh | 04/2024 | CGPA: 9.12

ACHIEVEMENTS

- 1st Position, College Tech Fest — built and presented a full web project to judges under time pressure.
- Competed in 5+ national-level hackathons — ranked 13th nationwide with a blockchain expense-splitting app.
- Architected a Space-Tech Aggregator — consolidated NASA and ISRO datasets into a single queryable API.
